

Client Day Care

Imagine: You use this course to fill your inbox with local business owners who have problems or needs...

You look through this service directory for a service that can solve the business' problem and sell them on the solution.

You collect fees and pay a small portion to the service company or outsourcer to do the work.

The following companies and partners offer everything, including SEO, social media management, Google Profile management, advertising, and more

...everything 90% of your clients will ask for.

In many cases, your clients log into their account to see their dashboard completely white labeled with your information and company brand.

You collect your payment, drop them off with this 'client day care' outsource, and your work is done.

Beyond individual outsourcers, there is one company that has been a consistent source of reliable work.

Use www.seoreseller.com to manage the most common digital marketing services.

Consider this company carefully and do your own due diligence.

Lastly, this is not the only game in town.

There are other companies. I encourage you to do your homework and choose a vendor for your business responsibly.

Heads Up: I do not own or operate this company. Nor do I have an affiliate agreement with them. This is provided to you to help you get the work done with clients. I receive no backend charges and no commissions are presently paid to me for recommending these services.

Lastly, it would be appropriate to wait until you have signed a client before reaching out to any outsourcer or company to do the work since so much of what happens next is based on the exact needs of the client, and what you sold them.

Client Day Care

This nuance wouldn't necessarily apply for a company or program that has the 'day care' company performing outside sales and marketing on your behalf.

Note: Not all vendors or outsourcers will have immediate availability. Whether they change their listing, or go on vacation, some gigs may not be available all the time. Suitable replacements can be found by searching for your need, and ensuring you work with vendors who have many high ratings, completed projects, and favorable reviews.
